Blockchain Exchange Product

Initiate Project — Planning & Research

- Defined product scope, features, and core user flows for a blockchain-based exchange platform.
- Conducted competitive analysis and user flow research to refine product structure.
- Developed prototypes and flowcharts to visualize user experience and system logic.
- Collaborated with the CEO to clarify client requirements and ensure functional feasibility.

Qualify:

- Conducted feature testing and proposed improvements to enhance front-end usability and workflow efficiency.
- Collaborated with developers to resolve critical bugs and improve product reliability.

專案企劃

比特帶物流科技股份有限公司（電腦軟體服務業 1~30人）

產品企劃 | 台中市西區

2022/3~2023/5

1年3個月

Freeport Metaverse

Contributed to the planning and coordination of a metaverse game integrating blockchain for cross-platform virtual asset management.

Whitepaper

Marketing:

- Drafted and maintained the whitepaper based on stakeholder input, user feedback and development timeline && milestones.
- Managed community engagement and digital marketing campaigns (mainly Discord && Twitter) to ensure consistent brand messaging, including event recaps, product updates, and maintenance announcements.
- Created visual content to strengthen brand storytelling and player outreach.
- Engaged in cross-industry collaboration discussions with other blockchain projects and enterprises.
- Authored cross-brand collaboration missions and storylines, integrating partner brand elements into the game to enhance player engagement and brand recognition.
- Coordinated with KOLs and online communities to communicate product vision and execute promotional campaigns.
- Collected and analyzed collaboration data to inform product optimization and marketing strategies.
- Organized content production schedules and event timelines, tracking engagement metrics and performance outcomes.
- Supported in-game virtual land sales, achieving a total transaction value of approximately NT\$5 million (≈USD 150,000).

Plan:

- Researched industry trends and competitive landscape to inform product design recommendations, providing insights to teams for decision-making.
- Designed game missions, narrative story-lines, level design, and character development.
- Documented design specifications and coordinated cross-functional collaboration between developers and designers.

Develop & Qualify:

- Conducted Beta testing and game mechanics optimization using data-driven insights.
- Oversaw continuous debugging and UX enhancement for improved game-play experience.

Additional Contributions:

- Product - "**Gaia**" press releases.
- Product - "**EzTokenPass**" video content(YT).

求職條件

希望性質 全職工作
上班時段 日班
可上班日 錄取後隨時可上班
希望待遇 面議
希望地點 台北市、新北市

希望職稱 產品/專案經理
希望職類 專案經理、產品經理、產品管理師、前端工程師

語言能力

英文

聽/精通 | 說/精通 | 讀/精通 | 寫/精通

Professional Summary

I bring a multidisciplinary background in political economy, philosophy, and product development, enabling me to approach product challenges with clarity, analytical rigor, and human-centered thinking. With hands-on experience across front-end engineering, product management, project delivery, and UX design, I work fluidly between strategy and execution—turning abstract ideas into testable, scalable solutions.

My technical experience allows me to collaborate effectively with engineers, assess feasibility, and balance architecture, performance, and UX considerations. I excel at bridging communication across business, design, and engineering teams to deliver products that are desirable, practical, and resilient.

I'm driven by how technology shapes human behavior and believe meaningful digital experiences require both emotional resonance and technical excellence.

Also, self-taught in front-end development, proficient in JavaScript, CSS, and HTML, with practical experience using React.js to build full-featured web applications from the ground up.

Key Projects:

- **E-commerce Platform** — Built a responsive shopping system with React, integrated Back-end APIs, and implemented state management with Redux. Styled layout using Bootstrap.

[GitHub](#) | [Live Demo](#)

- **2025 Osaka World Expo Website Clone** — Recreated an existing design using Tailwind CSS and RWD (768px only).

Relevant Certifications: Coursera

- Google Project Management
- IBM Product Management
- Google UX Design
- Rutgers Supply Chain Management
- IBM Introduction to Cloud Computing

Personal Traits

• Logical thinker • Critical thinking • Inquisitive and empathetic • Collaborative team player • Highly responsible and detail-oriented

Project Management

- Developed and maintained comprehensive project documentation across planning, execution, and testing phases.
- Defined project scope and milestones, and maintained schedules to ensure on-time and quality delivery.
- Facilitated cross-functional communication and collaboration.
- Collected and analyzed user feedback and QA results to plan iterative product improvements.
- Conducted product testing and debugging to support stable and timely releases.
- Delivered clear project updates, proposals, and presentations to stakeholders using PowerPoint and Canva.

Tools:

Notion, Slack, Jira, Google Workspace, PowerPoint, Excel, Word

#專案溝通／整合管理 #專案時間／進度控管 #專案規劃執行／範圍管理 #專案管理架構及專案說明 #提案與簡報技巧 #PowerPoint #Word #Excel #專案成本／品質／風險管理

Product Management

- Defined product vision and strategy based on market insights and user research.
- Created product proposals, release roadmaps, and testing documentation to guide development.
- Conducted market and competitor analysis to refine product positioning and identify business opportunities.
- Designed user-centered workflows and experiences using UX tools such as User Journey, User Story, Wireframe, Prototype, and Flowchart.
- Collaborated closely with designers and engineers to align user needs, business goals, and technical feasibility.

Tools:

Draw.io, Figma, Photoshop
